

# AQUAFITMAT

*The floating pool mat!*

This floating mat is designed to enable all pools to **offer a new aquatic activity with no constraints on water depth or pool shape.**

The Aquafitmat inflates like a paddle. Designed for easy attachment between 2 water lines with the docking kit, it's quick to set up. **This educational mat has been specially designed to use balance and imbalance.** Printed patterns on the EVA cover enable users to clearly identify the work zones indicated during the course. **This mat enables coaches to structure their sessions to facilitate learning.**

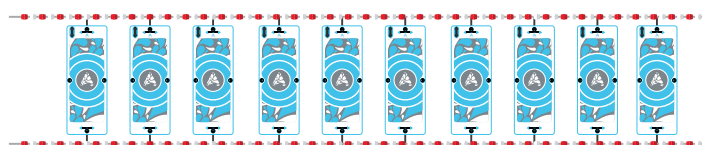

## DROP-STITCH TECHNOLOGY ULTRA-RIGID

This mat features **Drop-Stitch + Double Layer** technology, consisting of a mesh of thousands of polyester fibers reinforced by a **PVC** layer. **Extreme rigidity, ideal for overweight people, and unrivalled sturdiness.**
