STEP 27

STEP 28

STEP 29

PROBLEMS	POTENTIAL CAUSES	SOLUTIONS
Bubble Jet system is not operating	A1 Air pump is too hot A2 Something is wrong with the heater unit A3 Air Pump is in cooling mode	A1 Unplug the system. After the air pump has cooled, insert the plug and press the bubble button to activate A2 Wait for 10 Minutes and restart A3 Contact customer services if it does not reset
Heating system does not operate	A1 Water is too hot/above sensor maximum A2 Temperature is set too low A3 Dirty filter cartridge A4 Improper water levels A5 Heating element failure	A1 Unplug the spa and allow the water to cool A2 Set to a higher temperature (68-104°F) than the current water temperature A3 Clean/replace the filter cartridge A4 Add water to the specified levels A5 Contact customer services for advice
Filtering system does not operate / Rattling noise when switching filter on	A1 Dirty filter cartridge A2 Something is wrong with the heater unit	A1 Clean/replace the filter cartridge A2 Contact customer services if it does not reset A3 Ask a professional electrician to check whether the household electrical supply is functioning correctly
Wave Spa leakage	A1 Wave Spa is torn or punctured	A1 Use the repair patch provided
Water not clean	A1 Insufficient filtering time A2 Dirty filter cartridge A3 Improper water maintenance	A1 Increase filtration time A2 Clean/replace the filter cartridge A3 Refer to the chemical manufacturer's instructions
Display temperature is higher than 40°C, after stopping heating function	A1 Residual water in the Wave Spa will continue to be heated by residual temperature A2 Water inlet through the filter system may be blocked	A1 Unplug from mains and wait. The temperature will start to reduce and return to normal A2 Clean the inlet

CODE	CAUSE	SOLUTIONS
FC	When the filtration system has worked for approx. 168 hours, FC (Filter Change) will appear on the display screen of your Wave Spa accompanied by a warning tone. The red light will still be lit on the 'Filter' button, but the pump will not be operational. The heating system will also not work, and the red light will be out on the 'Heater' button	You should check the filter and change if necessary. Once you have done this, you need to press the 'Filter' button again. The 'FC' error code will disappear, and the warning tone will stop. The water temperature will be displayed, and all functions will return to normal.
SL / HL	Temperature Issue	Contact Wave customer services
SH	Water Temperature Sensor Issue	Contact Wave customer services
