

## CILINDRO

### SAUNA ESSENTIALS, WITH STYLE

- **Soft, enveloping warmth :** Thanks to its cylindrical shape and large stone capacity, the Cilindro stove diffuses an intense but pleasant heat, ideal for family saunas and communal areas alike.
- **Made-to-measure orders :** Available as a manually operated version or with a remote control unit, the Cilindro can be adapted to suit your installation and operating preferences.

- **Elegant steel design :** Its stainless steel finish adds a touch of modernity and refinement to any sauna, while guaranteeing exceptional durability.
- **Flexible installation :** Recessed in benches or set off against a glass wall, it blends harmoniously into your layout, giving free rein to your design creativity.

#### WARRANTY

STOVE **2 YEARS**

Sauna cabin  
from 6 to 20m<sup>3</sup>

Stone capacity  
up to 140 kg

**Dual**  
control system

## POWERFUL HEAT, REFINED DESIGN

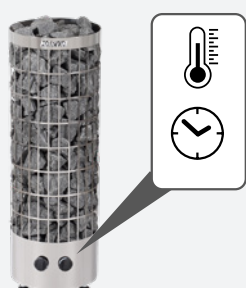

The Cilindro stove combines heating power and careful design for an optimal sauna experience. **Its unique cylindrical shape** allows to accommodate a large amount of stones (up to 140 kg depending on the model), ensuring **a gradual and homogeneous diffusion of heat**.

Ideal for family saunas as well as larger spaces, **its compact size means it can be integrated harmoniously**

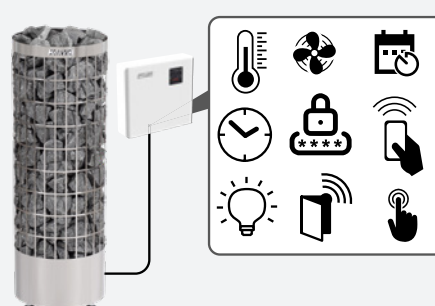

**into any configuration, either built-in or in front of a glass wall.**

Harvia Cilindro is available with integrated manual control or with a remote control unit to suit your personal preferences. Its stainless steel casing gives it a modern look and excellent durability.

### SINGLE OR REMOTE CONTROL : CHOICE IS YOURS

**Integrated manual control :** Directly accessible from the front of the stove, it allows you to easily adjust the temperature and running time using a mechanical thermostat and timer. It's ideal for simple installations and users looking for quick, intuitive start-up.

**Remote control via Harvia unit :** For more comprehensive management and more discreet installation, opt for an external control unit. Placed outside the cabin or nearby, it offers precise temperature control, time programming, lighting control and even delayed start-up, depending on the unit chosen.
